

FOOD CONTACT DECLARATION

We confirm that our product **PP Woven Sacks & PP Small Bags** have been formulated and manufactured in accordance with the compositional requirement which is considered safe for direct and indirect food packaging.

Legal Compliance :-

1. United States (FDA)

The polypropylene resin used in the manufacture of this Flexible Intermediate Bulk Container (FIBC) complies with the applicable requirements of the U.S. Food and Drug Administration (FDA) for food-contact materials under **21 CFR 177.1520 (Olefin Polymers)**.

Where applicable, all additives and other raw materials comply with the relevant requirements of **21 CFR Parts 174,177**.

The product is manufactured in accordance with Good Manufacturing Practices (GMP) and is suitable for food-contact applications when used as intended.

No substances prohibited under the applicable provisions of **21 CFR Part 189** are intentionally added during the manufacture of this product.

2. European Commission Regulation

We hereby declare that the polypropylene resin used in the manufacture of this Flexible Intermediate Bulk Container (FIBC) complies with the applicable requirements of the following European food contact legislation:

- ✓ Regulation (EC) No. 1935/2004 on materials and articles intended to come into contact with food.
- ✓ Commission Regulation (EU) No. 10/2011 on plastic materials and articles intended to come into contact with food, as amended.
- ✓ Regulation (EC) No. 2023/2006 on Good Manufacturing Practice (GMP) for materials and articles intended to come into contact with food.

The monomers and additives used in the polypropylene resin are included in the Union List of authorized substances under Commission Regulation (EU) No. 10/2011, as amended.

The polypropylene resin complies with the applicable Overall Migration Limit (OML) requirements specified in Commission Regulation (EU) No. 10/2011.

To the best of our knowledge, Bisphenol A (BPA), BADGE (Bisphenol A Diglycidyl Ether), BFDGE (Bisphenol F Diglycidyl Ether), NOGE (Novolac Glycidyl Ethers), and other restricted bisphenol substances are not intentionally used in the manufacture of the polypropylene resin.

3. Animal Derived Content (BSE/TSE Statement) (EC 999/2001)

We hereby declare that the polypropylene resin used in the manufacture of this Flexible Intermediate Bulk Container (FIBC) is neither derived from animal or human origin nor manufactured using intermediates and/or auxiliary agents of animal or human origin.

To the best of our knowledge, no materials of animal origin are intentionally used in the manufacture of this product. Accordingly, the product is considered free from Bovine Spongiform Encephalopathy (BSE) and Transmissible Spongiform Encephalopathy (TSE).

This declaration is based on the compliance information provided by the raw material suppliers, including compliance with Regulation (EC) No. 999/2001, as amended.

4. Heavy Metals

We hereby declare that the polypropylene resin used in the manufacture of this Flexible Intermediate Bulk Container (FIBC) complies with the requirements of Directive 94/62/EC on Packaging and Packaging Waste, as amended, with respect to the concentration of heavy metals.

To the best of our knowledge, the combined concentration of Lead (Pb), Cadmium (Cd), Mercury (Hg) and Hexavalent Chromium (Cr(VI)) in the product does not exceed 100 ppm (0.01% by weight).

5. China Food Contact Compliance

We hereby declare that the polypropylene resin used in the manufacture of this Flexible Intermediate Bulk Container (FIBC) complies with the applicable requirements of the following Chinese food contact regulations:

- **GB 4806.1** – National Food Safety Standard – General Safety Requirements for Food Contact Materials and Articles.
 - **GB 4806.7** – National Food Safety Standard – Plastic Materials and Articles Intended to Come into Contact with Food.
 - **GB 9685** – National Food Safety Standard for the Use of Additives in Food Contact Materials and Articles.
 - **GB 31603** – National Food Safety Standard – General Hygienic Practice for the Production of Food Contact Materials and Articles.
-
- 

The polypropylene resin used in the manufacture of this product complies with the applicable requirements of the above Chinese food contact standards.

The FIBC is manufactured using food-contact compliant raw materials under hygienic manufacturing conditions suitable for the intended food contact application.

6. REACH Compliance

The material complies with the applicable requirements of **Regulation (EC) No. 1907/2006 (REACH), as amended**.

Based on the declarations and information provided by our raw material suppliers, and to the best of our knowledge, none of the substances included in the **REACH Candidate List of Substances of Very High Concern (SVHC), updated on 4 February 2026**, are intentionally present in this product above the applicable reporting threshold.

7. NANO MATERIAL STATEMENT

We declare that our products are not produced with Nano – material as defined in EU Commission Recommendation 2011/696/EU.

This information is provided based on and in accordance with the declarations of our suppliers and applies to the materials as produced in our production facilities.

8. Halal and Kosher Declaration

To the best of our knowledge and based on declarations and information received from our raw material suppliers, the above-mentioned grade:

- Does not contain intentionally added ethyl alcohol.
- Does not contain ingredients of pork or pork origin.
- Does not contain ingredients derived from bovine, porcine, ovine, caprine, fish, poultry, insects, or human origin.
- No animal-derived enzymes are intentionally used in the manufacture of the raw materials used in this product.

This declaration is based solely on information and declarations provided by our raw material suppliers. We do not perform independent verification of these statements.

9. GMO STATEMENT

We hereby state that the product manufactured at our plants do not contain any GMO material.

10. ALLERGEN DECLARATION

We hereby state that there is no allergen present in our manufacturing area and in our products.

11. RECYCLED MATERIAL STATEMENT

We hereby declare that no recycled plastic materials are used in the manufacture of this Flexible Intermediate Bulk Container (FIBC).

The FIBC is manufactured using 100% virgin plastic raw materials and complies with the applicable requirements of Commission Regulation (EU) 2022/1616, as amended, Regulation (EC) No. 2023/2006 (GMP) and Commission Regulation (EU) No. 10/2011, as amended for food contact applications.

12. JAPAN COMPLIANCE STATEMENT

We, hereby state that the raw materials that we use are complying to Japan Positive List requirements.

13. Restricted Substances Statement

We hereby declare that the polypropylene resin used in the manufacture of this Flexible Intermediate Bulk Container (FIBC) does not intentionally contain substances restricted or prohibited under applicable food contact regulations.

Based on information provided by our raw material suppliers, the product does not intentionally contain:

- Bisphenol A (BPA), BADGE, BFDGE and NOGE
 - Phthalates (including DEHP, DBP, BBP, DINP, DIDP and other restricted phthalates)
 - Heavy metals (Lead, Cadmium, Mercury and Hexavalent Chromium) above applicable regulatory limits
 - PFAS / PFOS substances
 - Polybrominated flame retardants (PBB, PBDE and related substances)
-
- 

- 
- PCBs, PCTs, dioxins and furans
 - Organotin compounds
 - Aromatic amines and restricted azo colorants
 - Substances classified as CMR (Carcinogenic, Mutagenic or Toxic for Reproduction) according to applicable regulations

The product complies with applicable requirements of **Regulation (EU) No. 10/2011, as amended, FDA 21 CFR 177.1520**, and other relevant food contact regulations.

14.MOSH / MOAH Declaration

We hereby declare that Mineral Oil Saturated Hydrocarbons (MOSH) and Mineral Oil Aromatic Hydrocarbons (MOAH) are not intentionally added during the manufacture of this Flexible Intermediate Bulk Container (FIBC).

This declaration is based on information provided by our raw material suppliers and our manufacturing process.

15.Packaging and Packaging Waste Compliance (PPWR & CONEG)

We hereby declare that the polypropylene resin used in the manufacture of this Flexible Intermediate Bulk Container (FIBC) complies with the applicable requirements of Regulation (EU) 2025/40 on Packaging and Packaging Waste (PPWR).

The material does not intentionally contain Bisphenol A (BPA). The total concentration of incidental heavy metals, including Cadmium (Cd), Lead (Pb), Hexavalent Chromium (Cr VI) and Mercury (Hg), does not exceed 100 ppm.

The product also complies with applicable CONEG (Coalition of Northeastern Governors) heavy metal requirements for packaging materials.

This declaration is based on information provided by our raw material suppliers.

16.NIAS (Non Intentionally Added Substances) risk assessment

Non intentionally added substances risk assessment has been done based on over all migration result , source material chemical composition and reaction in manufacturing process of PP Fabric and Webbing.

No any hazardous substances (as per SVHC list updated on 4 Feb 2026 published in accordance with Article 59(10) of the REACH Regulation) is used in raw material for concern product and no bye product or any other hazardous / toxic product / intermediate product generated during PP tape extrusion and coating extrusion process where different raw material mixed and melted to form PP tape and coating.

We also do not add any other chemical intentionally in the product

17.Shelf Life

The product FIBC is suitable for its intended use from 2 years of its production month and year . the FIBC (empty and filled) must be stored as per guideline provided in ISO 21898:2024 standard .
